Financial Transaction ETL Pipeline
Data Dictionary
Created by Justine Berger Oct 2026

# Data Dictionary

Created using Entity-Relationship Diagram (ERD).png and readme.md corresponding to the raw data used for the project.

Raw data files were obtained from Kaggle at:
https://www.kaggle.com/datasets/testdatabox/finance-fraud-and-loans-dataset-testdatabox/data

## account_statuses

Account lifecycle states.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| AccountStatusID | integer | PK | No | Unique account state identifier |
| StatusName | varchar(100) | - | No | Status description (i.e. Active, Inactive, Closed) |

## account_types

Account categories.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| AccountTypeID | integer | PK | No | Unique account type identifier |
| TypeName | varchar(100) | - | No | Type description (checking, savings, payroll etc.) |

## accounts

Bank accounts linked to customers, with type and status.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| AccountID | integer | PK | No | Unique account identifier |
| CustomerID | integer | FK | No | References customers (CustomerID) |
| AccountTypeID | integer | FK | No | References account_types (AccountTypeID) |
| AccountStatusID | integer | FK | No | References account_statuses (AccountStatusID) |
| Balance | numeric(10,2) | - | No | Current ledger balance |
| OpeningDate | date | - | Yes | Date of account opening |

## addresses

Address data linked to customers and branches.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| AddressID | integer | PK | No | Unique address identifier |
| Street | varchar(100) | - | Yes | Street address lines |
| City | varchar(100) | - | Yes | City name |
| Country | varchar(100) | - | Yes | Country classification |

## branches

Bank branch metadata

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| BranchID | integer | PK | No | Unique branch identifier |
| BranchName | varchar(100) | - | No | Name of commercial location |
| AddressID | integer | FK | No | References addresses (AddressID) |

## customer_types

Classification of customers (e.g. personal, corporate).

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| CustomerTypeID | integer | PK | No | Unique type identifier |
| TypeName | varchar(100) | - | No | Type description (i.e. Individual, Small Business, Large Enterprise) |

## customers

Customer master data (id, type, demographics).

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| CustomerID | integer | PK | No | Unique customer identifier |
| FirstName | varchar(100) | - | Yes | Customer's first name |
| LastName | varchar(100) | - | Yes | Customer's last name |
| DateOfBirth | date | - | Yes | Customer's date of birth |
| AddressID | integer | FK | No | References addresses (AddressID) |
| CustomerTypeID | integer | FK | No | References customer_types (CustomerTypeID) |

## loan_statuses

Loan states.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| LoanStatusID | integer | PK | No | Unique loan state identifier |
| StatusName | varchar(100) | - | No | Loan state description (i.e. Active, Paid Off, or Overdue) |

## loans

Loans issued, with type, status, and customer references.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| LoanID | integer | PK | No | Unique loan identifier |
| AccountID | integer | FK | No | References accounts (AccountID) |
| LoanStatusID | integer | FK | No | References loan_statuses (LoanStatusID) |
| PrincipalAmount | numeric(10,2) | - | No | Starting debit balance |
| InterestRate | numeric(7,5) | - | No | Percentage rate of interest |
| StartDate | date | - | Yes | Initiation date of the loan |
| EstimatedEndDate | date | - | Yes | Target close date of the loan |

## transaction_types

Transaction categories (e.g. payment, transfer, withdrawal).

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| TransactionTypeID | integer | PK | No | Unique transaction type identifier |
| TypeName | varchar(100) | - | No | Description of transaction type (i.e. Deposit, Withdrawal, Transfer, Payment) |

## transactions

Financial transactions with customer, account, branch, and type references.

| Column Name | Data Type | Key Type | Nullable | Description |
|---|---|---|---|---|
| TransactionID | integer | PK | No | Unique transaction identifier |
| AccountOriginID | integer | FK | No | References accounts (AccountID) |
| AccountDestinationID | integer | FK | No | References accounts (AccountID) |
| TransactionTypeID | integer | FK | No | References transaction_types (TransactionTypeID) |
| Amount | numeric(10,2) | - | No | Amount of transaction |
| TransactionDate | date | - | | Date transaction finalizes and settles |
| BranchID | integer | FK | No | References branches (BranchID) |
| Description | text | - | Yes | Text description of transaction |
